# Fares Abdelsttar Gomaa

## Dynamics 365 CE Developer | Power Platform | C#/.NET | Azure | Integrations

fares.gomaa.work@gmail.com +201033945260 Cairo, Egypt Portfolio Fares Abdelsttar
FaresGomaa1 @FaresGomaa1999 Fares G. FaresGomaa1 fares1937 +201033945260

## Objective

Dynamics 365 CE and Power Platform Developer with hands-on experience delivering enterprise CRM solutions using Dataverse, Model-Driven Apps, C#, JavaScript, plugins, workflows, integrations, and Power Platform. Experienced in integrating Dataverse with external systems and implementing CI/CD using Azure DevOps. Strong background in .NET, SQL Server, REST APIs, and Azure services

## Technical Skills

**Dynamics 365 & Power Platform** — Dynamics 365 CE, Dataverse, Model-Driven Apps, Canvas Apps, Power Automate, Power Pages, Business Process Flows, Plugins, Custom Workflows

**Frameworks & Platforms:** — ASP.NET Core, MVC, Razor Pages, Angular, Node.js, Express.js, SharePoint

**Databases & APIs:** — MS SQL Server, Entity Framework, LINQ, RESTful APIs, JSON Web Tokens (JWT)

**Tools & DevOps:** — Git/GitHub, **Azure (App Service, Functions, Cosmos DB, Application Insights)**, ESLint, npm, Windows Forms, Azure DevOps, SSIS, SSRS

**Programming Languages** — C# (Advanced), TypeScript (Advanced), JavaScript (Intermediate), HTML5, CSS3

## Professional Experience

Jun 2026 – Present
Maadi, Cairo

**Link Development**
Senior Software Engineer
- Analyzed complex technical problems and provided innovative solutions using strong algorithmic and design principles.
- Maintained clear technical documentation to support long-term scalability and system maintainability.
- Stayed updated with modern technologies, ensuring the application of best engineering practices.

Jun 2024 – Jun 2026
Maadi, Egypt

**Link Development**
Software Engineer
- Contributed to building and enhancing software solutions while gaining hands-on experience across the development lifecycle.
- Focused on writing clean, efficient, and maintainable code, while fixing bugs and implementing features.
- Collaborated with senior engineers in agile teams, applying best coding practices and ensuring code quality.

Apr 2024 – Jun 2024
Remote

**Freelancing**
Full Stack Developer
- Built an **E-commerce platform** with ASP.NET Core Web API (backend) and Angular frontends for customers/admins; designed REST APIs to support high concurrency.
- Implemented secure auth with **Identity Framework + JWT**, role-based authorization, and refresh token flow for long sessions.
- Designed the data model using code-first **Entity Framework** and optimized queries; added basic telemetry (request durations, error rates) to support performance tuning.
- Performed load testing and basic performance tuning (caching, pagination, DB indexing) to support hundreds of concurrent users.

## Projects

Oct 2024 – Feb 2025

**ZATCA**
Country: Saudi Arabia
- Upgraded core CRM modules (Ticket, Complaint, GSTC, Suggestion, Inquiry) from legacy version to the latest Dynamics 365 release, ensuring functional continuity post-upgrade
- Managed end-to-end customer interaction workflows across five modules, including SLA-tracked ticket resolution and multi-stage complaint investigation processes
- Developed integrations between Dynamics 365 and external platforms using REST/OData APIs to enable seamless data exchange
- Worked within Dataverse to maintain data structure integrity throughout the upgrade process

Apr 2025 – Jul 2025 **Ministry of Justice (MOJ) – Conflict Resolution Project**
Country: Egypt
- Designed and configured Dataverse entities and relationships to model a multi-session conflict resolution process, ensuring data structure integrity across linked requests and sessions
- Customized forms and views to align user experience with citizen/organization case-management business requirements
- Developed C# plugins and custom workflows to implement business logic including automated decision propagation from session records to parent case records
- Configured security roles and field-level security to enforce access control and data protection across the system
- Built Word template generation for sessions and conflict requests to automate documentation and reporting

Feb 2026 – Present **Modon - CRM Project**
Country: Saudi Arabia
- Analyzed existing Dynamics 365 architecture to introduce a new core category into a large-scale investor-request CRM system, spanning land allocation through contract lifecycle management
- Updated interconnected components — Business Process Flows, validations, and related services — to integrate new functionality without regressions across existing modules
- Supported complex contract lifecycle operations including splitting, merging, renewal, and closure workflows
- Maintained system consistency across modules by aligning new logic with existing business rules and process flows

## Certifications & Awards

09 Jul 2025 **Power Platform Functional Consultant Associate**
Microsoft

Mar 2025 **Build and Extend your own agents using pro-code capabilities**
Microsoft

Mar 2025 **Building and extending AI-powered copilots with Copilot Studio**
Microsoft

Jan 2025 **SQL (Intermediate)**
HackerRank

Apr 2024 **EF SET English Certificate 57/100 (B2 Proficient)**
EF Standard English Test (EF SET)

Dec 2024 **McKinsey Forward Program**
McKinsey & Company

## Education

Sep 2017 – Sep 2022
Fayoum, Egypt
**Bachelor's in Engineering**
Fayoum University

Oct 2025 – Present
Gizza, Egypt
**Postgraduate Diploma in Computer Science**
Cairo University

## Courses

Feb 2024 – Feb 2025 **Software Engineering**
ALX

Nov 2023 – Apr 2024
Beni Suef, Egypt
**Full Stack Development Using .NET**
Information Technology Institute (ITI)

Nov 2022 – Jan 2023 **Professional Front-End Web Developer**
Udacity

## Languages

Arabic | English
